PROFESSIONAL SUMMARY

Technical Operations Analyst with 4+ years in customer-facing operations, escalation triage, SLA management, root-cause analysis, and data analytics. Supported 100+ IP surveillance deployments using ServiceNow and JIRA. Hands-on with SQL, KQL, Power BI, Python, and Excel, plus Defender for Endpoint and Sentinel lab investigations. Seeking a **Customer Experience Engineer II, Microsoft Security** role.

CORE COMPETENCIES

Escalations & CX: Escalation Management, Incident & Problem Management, Root-Cause Analysis, SLA Management, Customer Communication

Data & BI: SQL, Python, Pandas, Power BI, DAX, Excel, KPI Reporting, Data Quality, Trend Analysis

Microsoft Security: Defender for Endpoint, Microsoft Sentinel, KQL, Alert Triage & Investigation, MTTR Analysis

Tools & Ops: ServiceNow, JIRA, GitHub, Confluence, Streamlit, SOPs & Runbooks, Process Improvement, Networking

PROFESSIONAL EXPERIENCE

Operations Analyst (Network and Data Operations)
Oct 2023 – Present

A2N Technologies Pvt Ltd | India (Remote)

- Own customer incident and escalation triage across **100+ IP surveillance deployments**, tracking impact, status, and resolution in ServiceNow and JIRA.
- Investigate network and service-impacting incidents through troubleshooting and RCA, coordinating with technical teams to resolve them.
- Maintain and analyze **150+ client infrastructure records**, finding data inconsistencies and duplicate IPs using SQL and Excel.
- Built an Excel/Power BI dashboard (**200+ records**) tracking uptime, bandwidth, SLA performance, MTTR, and recurring issues.
- Review **40+ tickets weekly** to spot incident patterns; prepare weekly KPI, SLA, and incident reports.
- Turn recurring issues into process and troubleshooting improvements through feedback loops.

Staffing Operations Analyst
Jun 2022 – Aug 2023

Global Management Services | India (Remote)

- Managed **150+ client requirements and 500+ candidate records**; tracked 40+ requests weekly against SLA, turnaround time, and pipeline bottlenecks.
- Investigated SLA breaches with SQL and Excel analysis; built an Excel KPI dashboard (**200+ positions**) using PivotTables and XLOOKUP/VLOOKUP.
- Created SOPs and runbooks to standardize processes; resolved time-sensitive requests within SLA.

MICROSOFT SECURITY – HANDS-ON LAB

Microsoft Defender & Sentinel Security Investigation Lab

Microsoft Defender for Endpoint | Microsoft Sentinel | KQL

- Investigated **10+ Defender for Endpoint alerts** (malware and phishing), triaging by severity, device, activity, and context.
- Wrote **5+ KQL queries** in Sentinel to filter high-severity alerts and aggregate alerts by severity and device.
- Practiced the full workflow of identification, triage, investigation, and prioritization across Defender for Endpoint, Sentinel, Defender for Cloud, and Defender for Office 365.

SELECTED PROJECTS

- **Helpdesk KPI Dashboard** (Python, Pandas, SQL, Power BI, Streamlit): deduplicated 3,672 raw tickets to 3,600 using SQL window functions (ROW_NUMBER, LAG); analyzed SLA, CSAT, repeat tickets, and MTTR.
- **BI Validation & Monitoring** (Power BI, SQL, Python): validation framework with automated data-quality checks and SQL reconciliation.
- **KPI Operations Dashboard** (Excel, Power BI, DAX): SLA, workload, QA, and rework metrics with reusable DAX measures.

EDUCATION & CERTIFICATIONS

BCA, Amar Singh College (2021) | **Certifications:** Cisco CCNA, Postman API Fundamentals, Technical Writing, Microsoft Defender & Sentinel Security Investigation Lab
